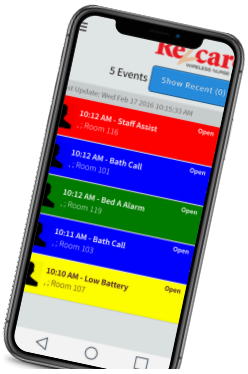
ReZcare Mobile



SMD INC.

Facilitating an Efficient and Timely Response to Residents in Need

Features

ReZcare Mobile allows staff to:

- instantly receive and respond to system notifications
- view active alarms from all integrated systems in same color coding as appears on the nurses' station monitor
- view recently cleared alarms on their mobiles device
- use devices (tablets/phones) that operate on cellular service or Wi-Fi
- privately message coworkers to provide additional information on resident status or request assistance

Outcomes

Putting all alarm activity at the fingertips of each caregiver:

- reduces redundant communications
- means staff know quickly who has taken responsibility to respond to a notification
- reduces audible staff communications thereby improving residents' living environment
- reduces number devices staff must manage
